

FROST

Design by

Claudio Dondoli & Marco Poggi

Description

The uncluttered, contemporary lines of the FROST table make it just as suitable for use in a dining room as it is in a living room with open kitchen.

Base in satin anthracite lacquered aluminium.

Choice of 2 tops:

- top and extension in laminated panels of particleboard, offering excellent resistance under intensive daily use.

- top in 11 mm thick metallic anthracite ceramic stoneware (6 mm thick ceramic stoneware glued onto 5 mm thick clear glass). Extension in panels of particleboard clad in anthracite laminate, offering excellent resistance under intensive daily use.

The 50 cm extension is stored beneath the top.

The table is extended by moving the base, which is equipped with 2 nylon gliders and 2 castors. In open position, with 1 extension, the length of the table increases from 160 to 210 cm. A second extension, sold separately, may be added if desired.

DINING TABLE WITH INTEGRAL EXTENSION ANTHRACITE LACQUER
