

# MÔME

**Design by**  
Lily Sallant

## Description

The MÔME table is inspired by the little Korean tables known as "sobans". Traditionally produced in wood by hand by master craftsmen, they are used as work tables, or even to present and serve meals to guests individually. This archetype seems pertinent to our current ways of living, having been brought up to date in terms of colour and a more pared-down shape which is more accessible and more easily reproduced.

Small occasional table in gloss finish red or black lacquered ash. May be combined to create a large low table, or stacked to create small-scale storage.
