

NODUM

Design by
Guillaume Delvigne

Description

These two round-topped occasional tables may be used in combination, or alone. The focal point which renders them unique is their "heart", the X-shaped metal piece which forms their centre of gravity, as much structurally as visually. Guillaume Delvigne painstakingly designed each detail of this "micro architecture" in which the technical is lent beauty. Indeed, this can be seen particularly clearly in the tense design of the legs, which narrow towards their tips, or the very soft edge of the tapered solid wood top. Occasional tables in solid American walnut.
