

RIFT

Design by

C. Khorram & J.B. Ricatte

Description

A project developed by 2 young graduates of the École supérieure des arts décoratifs de Strasbourg for a design competition held by the Parc naturel régional des Vosges, Rift aims to make more room for wood in the home. It reinterprets the traditional technique of rod splitting, with the legs thus partially divided to allow various elements to be inserted and to streamline the silhouette of the stool. Bar stool in solid oak with black lacquered steel insert.
