

SONATE

Design by
M.-A. Stiker-Metral

Description

The Sonate console plays with the harmony and extreme discretion of 'cristal' glass, invisibly bonded into a geometric construction which plays with the balance of symmetry. Its almost invisible presence offers nothing less than true functionality thanks to its large upper surface and its two shelves located just beneath. The quality of finish is perfect: chamfered edges and rounded corners for a pleasant feel.

Console in 8 mm thick toughened 'cristal' glass, bonded with chamfered edges and rounded corners. Two small shelves are located beneath the large upper top.
