

VIBRATION

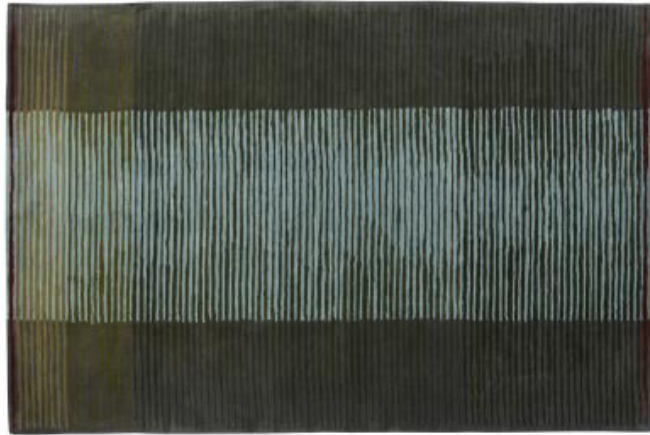

Design by
Vincent Tordjman

Description
The word 'motif' (motive) is from the same family as 'émotion' (emotion), 'motivation' (motivation) and even 'mot' (word). The 'motive' of the Vibration rug becomes clear over time : the mysterious dynamic of its shade ratios creates an optical impression of dynamism. In the same way as movements through air, the coloured resonances offer a feeling of energy evocative of the diffusion of music within a space.
Hand tufted rug in 80 % New Zealand wool / 20 % Indian wool. There are no corresponding colour samples available.
