

CHEST: QUAI LARGO

Design by
M.-A. Stiker-Metral

Description

The Quai Largo chest is a high-end contemporary interpretation of the kind of rosewood chest, the handcrafted decorative sculpted detailing of which is traditional in Asian countries.

This chest is entirely made from hand-carved solid rosewood, a tropical wood which is very dense, very hard and highly resistant: each stripe is gouged by hand to create an irregular, lively and unique effect.

Given the luxurious nature of this craftsman-made chest, only 75 numbered pieces have been made, with the piece number (MA-SM-/75) punched into the corner of the underside of the lid.
