

AKI & NATSU

Design by
Denis Guidone

Description

These two tufted woollen rugs were designed by their creator with nature in mind and more precisely, the changing seasons. "Natsu" embodies spring foliage, with a chromatic palette inspired by a panorama of lakes, firs and still partially snow-capped summits. As for "Aki", its dominant reddish-orange hues make us immediately think of layer upon layer of freshly-fallen autumn leaves. In both cases, very particular attention has been paid to the veins of those leaves, so that they can leave their imprint on our interiors.
